

## Dalinghaus Construction, Inc Lake California, US

**Address**

445 Birch St

**Contact Person**

Brian Dalinghaus

**Mobile Number****Email**

WeCare@DalinghausConstruction.com

Are you looking to have your foundation inspected? You don't have to trust just any company. At **Dalinghaus Construction, Inc**, we specialize in finding the cause of your damage and provide you with the best solution for long-term foundation repair & stabilization.

In the end, the only thing that matters is that you're pleased with our work and service. We're proud to not incentivize our Inspection Specialists with overselling repair recommendations. This can lead homeowners into making uninformed decisions based on numbers that don't adequately consider more important factors such as comfort, durability, energy efficiency, and aesthetics.

Allowing our customers access to their Houses Under Construction, we offer a one-on-one relationship and the opportunity to learn about your home's foundation issues in detail. We invite you to contact us to see for yourself what our satisfied customers have already experienced. We understand that having **home foundation repair** work done can be an overwhelming

- **Services:** Foundation Repair, Foundation Inspection, Underpinning, Concrete Lifting & Leveling, Seawall Repair, Seismic Retrofitting, Slope Stabilization
