At Flawless Laser & Body Sculpting, We're committed to helping you look and feel your best. We offer Botox and fillers for facial rejuvenation, and facials tailored to your needs. Take control of your skin with our premium services. With years of experience, we have helped hundreds of women look and feel their best. Laser hair removal is a medical procedure that uses a laser — an intense, pulsating beam of light — to remove unwanted hair. During laser hair removal in Calgary, a laser emits a light that is absorbed by the pigment (melanin) in the hair. The light energy is converted to heat, which damages hair follicles. This damage inhibits or delays future hair growth. We have training and experience to properly assess and treat sensitive skin and hair types to get real results without the risks.

OUR SERVICES:

- Botox
- Dermal Filler
- Laser Skin Resurfacing
- Body Slimming
- Fat Reduction
