Hybrid the Florist, Flower shop

Hybrid the Florist are one of London's best flower companies with the great privilege of creating beautiful flowers for events, parties, weddings, hotels and offices in the city of London. London inspires us every single day through its architecture, history, and people. In fact, it would be hard for us to imagine being florists anywhere else.

Hybrid the Florist was set up by the dynamic duo that is Caroline Ball and Alan Simpson, who became friends whilst working as freelance florists in London. **Hybrid the Florist** has grown organically over the years to a team of 14 professional florists from all four corners of the globe.

Hybrid the Florist are confident that there is literally nothing our floral team could not do given our combined professional floristry training, experience, and design flair.
