Whether you're making your way around the first floor of your house or preparing to scale Mt. Everest, arthritis pain can make every moment challenging. But you're not alone, and that's why you should consider visiting our practice at QC Kinetix (Lake Norman) to learn about how we can help ease your pain with treatments for knee tendonitis pain treatment or hip pain. In addition to our other arthritic pain treatments, we provide therapy for patients who want results without surgery.

With our arthritis pain treatments in Davidson, there is no cutting (no surgery), no long recovery times (instant relief), and no addictive narcotics or difficult exercises. Instead, we provide bio-stimulation of your body's healing process that has shown benefit to patients with hip tendonitis pain, Achilles tendon pain, and other joint problems. Our office has a team of experienced physicians, nurses, and staff members who are trained to help you get back on the road to good health.
