When you are suffering from joint pain, it can feel like you are stuck in a rut. You may be unable to get out of bed, or even walk without pain. But there are ways to treat joint pain without surgery or invasive procedures. Regenerative medicine is one of them!

QC Kinetix (Superior) offers **back pain treatment in Louisville** solutions for back pain and other treatment options for joint pain in the knees, hips, elbows, ankles, hands, feet, shoulders, and more. Whether you are suffering from pain due to arthritis or another musculoskeletal condition, we can help!

If you are here because you have had trouble walking or even performing activities as simple as sitting down and standing up for years, maybe your doctor has said that you need knee surgery or a hip replacement, you know how invasive they are: they take up to a year for patients to fully recover.
