With a high-quality floor coating, you can rest easy knowing that your floors are protected from damage. Polyaspartic Coating is a user-friendly, high-solids binary coating with low volatile organic compounds (VOCs). This means far fewer chemical smells and fumes compared to epoxy concrete floor coatings — which are perfect for indoor flooring. Better yet, polyaspartic coating is a durable and long-lasting coating that will keep your flooring strong while looking great!

By choosing **RW Custom Coatings**, you'll not only be getting a high-quality product but high-quality service. We want your experience with us to be as enjoyable and seamless as possible. Whether you're looking for **polyaspartic floor coating in Gastonia** for your garage, commercial space, or basement, we've got you covered. If you're unsure where to start your custom floor coating, simply request an estimate, and we'll take it from there to get you a flooring solution.
