## Upper Street Hardware

### Hardware, DIY store in London, England

**Upper Street Hardware** is a friendly hardware shop in the heart of Islington that sells DIY do it yourself everything and anything you need! The staff go above and beyond to solve your issue and sell you only the things they need. The shop is deceptively large and stretches backwards with plenty of aisles filled with everything from screws and nails to boutique door handles.

**Upper Street Hardware** store is the best shop for DIY stuff, you can find everything hardware you are looking for. The customer service is superb and they were so helpful and accommodating by helping me find what I needed. Would definitely go back here again in future
